Bob Peck opened his first Chevrolet dealership in 1939 on Wilson Boulevard in Clarendon. In 1964, he moved the dealership west to Ballston to the very prominent corner of North Glebe Road and Wilson Boulevard, 300 feet south of this marker. Taking advantage of the site's unique location and visibility, local architect Anthony Musolino designed a transparent circular showroom of glass and chrome, with a butterfly roofline whose frieze of diamond-shaped blue panels spelled out "Chevrolet." The building was an excellent example of Google architecture, reflecting the era's prevailing interest in the future — space travel, nuclear energy, rockets — through the use of upward slanting and cantilevered roofs, geometric patterns, acute angles, and large sheets of glass.

Peck Chevrolet was demolished in 2008.

Musolino's design evoked thoughts of flight and movement, with its walls of transparent glass and a roof that appeared to float skyward. The transparent showroom was a living billboard. Motorists could see the chrome-trimmed vehicles from the street. Peck Chevrolet became a community icon and a landmark for motorists traveling to and through Arlington. The showroom's design is represented in the new diamond-shaped frieze of the office building now located at the former Bob Peck site.
